Chamokane Creek Seepage Investigations

A series of discharge measurements were made September 18 - October 11, 2007, on Chamokane Creek and some of its tributaries to study gains and losses. The reach covered 30.7 miles. Two additional discharge measurements, made just outside of the Chamokane Creek drainage, are included in this table. These two sites, Sams Creek near Ford and Unnamed Springs outflow near Sams Creek Tributary near Ford, are both tributary to Little Chamokane Creek.
